

MANUEL GUERRERO GARCÍA

DATA ENGINEER | PYSPARK · SPARK · DATABRICKS CERTIFIED CLOUD & DATA PLATFORMS

LinkedIn maguercia@gmail.com 21002 Huelva, España

Data Engineer with nearly 3 years of experience designing, developing and modernizing enterprise data pipelines and distributed data processing solutions. Strong hands-on experience with PySpark, Apache Spark, SQL, Cloudera and Oracle-based data platforms, including the migration of legacy ETL workloads to scalable PySpark solutions processing datasets with tens of millions of records. Databricks Certified Data Engineer Associate with a solid academic background in Big Data & Cloud Computing and applied AI/ML research. Focused on building reliable, maintainable and scalable data platforms with strong data quality, governance and business value.

PROFESSIONAL EXPERIENCE

NTT DATA - Data Engineer · Data Engineering — Public Sector
Seville, Spain | Nov 2023 – Present

Data Engineer | Sep 2026 – Present

Junior Data Engineer | Nov 2023 – Aug 2026

Enel-Endesa — Legacy Data Discovery & Modernization
Discovery, profiling, and classification of legacy datastores to support their rationalization and migration toward modern data architectures. Structural analysis and processing of MATLAB (.mat) files using Python, with a focus on preparing data for transformation, storage, and exploitation through Parquet, HDFS, and Databricks.

Regional Government of Andalusia — Environmental Data Platform
Develop and maintain distributed data processing pipelines for large-scale environmental and air quality information systems.
Design and implement ETL and data transformation processes using **PySpark and Apache Spark** in a **Cloudera/YARN** distributed environment. Migrate legacy **Pentaho ETL workflows to PySpark**, improving maintainability, scalability and execution efficiency.
Process and transform datasets containing **tens of millions of records**, supporting reporting, regulatory and analytical workloads.
Integrate data from **Oracle, HDFS, HBase and Hive**, working across enterprise Big Data and relational environments.
Implement data quality, validation and traceability logic for business-critical reporting processes.
Analyze performance bottlenecks and optimize distributed processing workloads and data exploitation processes.

Andalusian Health Service — Data Governance & Integration
Developed ETL and data integration processes using **Stratio** for healthcare data platforms. Worked with Oracle databases, data modelling, transformation and loading processes within governed enterprise environments.

Extremadura Public Sector — BI & Oracle Data Platform
Installed and configured **Oracle Data Integrator 12c** environments, including repositories and ETL components. Developed analytical dashboards and reporting solutions using **Oracle Analytics Server 7.0**. Supported Oracle 19 data exploitation and administration for business intelligence workloads.

CERTIFICATIONS

Databricks Certified Data Engineer Professional
Databricks · Issued Oct 6, 2026

Databricks Certified Data Engineer Associate
Databricks · Issued Sep 3, 2026

AWS Certified Cloud Practitioner — CLF-C02
Amazon Web Services · Valid through Apr 2029

EDUCATION

MSc in Computer Engineering — Big Data & Cloud Computing
University of Huelva | Oct 2023 – Jun 2025

University Extension Diploma in Quantum Computing & Technologies
University of Málaga | Sep 2025 – Jun 2026
1,000 h · 40 ECTS equivalent

BSc in Computer Engineering — Software Engineering
University of Huelva | Sep 2019 – Dec 2023

Laurea Magistrale in Ingegneria Informatica — International Mobility
Università degli Studi di Napoli Federico II | Sep 2022 – Jul 2023

SELECTED RESEARCH

Multimodal Sexism Detection — EXIST 2025 | I2C-UHU-Altair | Jan 2025 – Jul 2025
Research on multimodal sexism detection and classification using **Vision-Language Models and LLMs**, including BLIP2 and Qwen. Published as part of **CLEF 2025 / EXIST 2025**. **Technologies:** VLMs · LLMs · NLP · Multimodal AI
https://ariasmontano.uhu.es/entities/publication/780a5194-cb42-4b1f-a230-3fc7ffcc0dec

Learning from Divergence and Perspectivism — EXIST 2024 | Oct 2023 – Jul 2024
Research on sexism identification and source-intent classification using **Transformers and Learning with Disagreement**, derived from the BSc thesis project.
Recognition: 4th place — Andalusia AI Thesis Awards · 2nd place — Aguas de Huelva Social Innovation Chair Awards
